Overton Wootton, of Chicago, is visiting at Dr. J. D. Estes' this week.

"Woman's Advantage Over Man"

By MISS FORTESCUE

Well, you see, there always is the "other side" to every question. And that's why, in the midst of the much talking about the legal disabilities of women, I wonder that so little has been said of the many points of view in which women are so much better off than men. I am not saying that women do not suffer from one side of the question, a wrong which starts at the beginning, continues throughout, and ends only with their life. And that wrong is—that they are born women without the smallest choice in the matter. But I do not see that the granting of the parliamentary franchise, even on the widest basis known, is going to remove that particular injury. And it seems to me that that is the root of the whole so-called "women's trouble." I did not want to be a woman, and I do not want to be a woman without the smallest choice in the matter. I do not want to be a woman without the smallest choice in the matter. I do not want to be a woman without the smallest choice in the matter.

often are. They may be painters, poets, postmistresses. They may "run" (and do) hotels, restaurants, feeding houses, shops; become manufacturers, house decorators—a hundred occupations are open to them; but are they ever required to leave their business at important moments and sit on juries? Not a bit of it! The mere male man is mulcted in so many working days to go and help administer the justice of this country; the working woman has all those days to the good. Whether all it may not be for the good of justice I leave wiser heads than mine to decide.

To be serious for a moment. How seldom is the death penalty inflicted on a woman! And yet, ethically, can it be denied that murder is at least as big a crime in a woman as in a man? (In speaking of murder I am not including the crime of the miserable mother who put their illegitimate offspring out of the world—that's another story.) But any student of the criminal records will point out how infinitely rarer, proportionately, is the death penalty inflicted on the female than on the masculine culprit. Whether at present recognizes the mother as well as the father, as the children's guardian; and it is my very honest belief that any reasonable wrongs that women suffer from, would in the future be put as reasonably right as they have been in the past.

What about the law which allows a woman to pledge her husband's credit (in proportion to his means, be it understood, it being always taken; but reverse the situation, and put the money on the feminine side, and a man cannot pledge his wife's credit; oh, dear, no.

Again, it must not be forgotten that all these laws for women's advantages have been passed by men.

It is not to be suggested for one moment that there are no injustices from which women may suffer. It is not a perfect world, and the men and women who compose it are singularly imperfect, too. But as the old country woman says: "They're the best we've got, so what's the good of grumbling?" When the intending purchaser remarks that the game was rather high! And it seems to me it is not at all a bad thing after cogitating on the disadvantages, to dwell sometimes on a few of the advantages of the law.

The married woman's property law act has made the working woman singularly safe. The law of England at present recognizes the mother as well as the father, as the children's guardian; and it is my very honest belief that any reasonable wrongs that women suffer from, would in the future be put as reasonably right as they have been in the past.
